Your Laptop Has Never Sounded So Good!

Built-in laptop speakers are pretty underwhelming and that's just a fact of life. Sure, they're good for a beep here and ping there, but if you've ever tried to share your favorite song, watch a movie, or make a multimedia presentation using your laptop speakers, you know exactly what we mean.

Introducing the Altec Lansing XT1 system. In addition to its thin, innovative design with removable stands, the XT1 delivers superb sound and surprisingly deep bass thanks to four full-range neodymium micro drivers and bass enhancement technology.

And just like your laptop, the XT1 knows how to travel light. Because it's USB-powered, there's no need for a power supply and no batteries to forget. Plug it into your USB port, press play, and you'll be listening to the best portable sound you've ever heard from a laptop. Pack it up in its deluxe carrying case, and you're ready for your next trip.

XT1 USB powered — **2** Speakers

Slim, portable design – Flat panel, shielded satellites with removable stands pack easily and go anywhere.

USB-Powered – Connects easily to laptops and desktops via retractable USB cable. No power supply needed!

Big Sound for Laptops – Four specially engineered full-range neodymium micro drivers with aluminum cones smoothly deliver a full spectrum of pure, distinct sound with unprecedented signal accuracy.

Quality Bass – Bass enhancement technology creates quality bass without a subwoofer.

Deluxe Carry Case – Compartment bag included for your traveling convenience.

Built-in Controls – Include power on/off and volume.

Auxiliary Input Jack – Connect two different audio sources – your laptop and MP3 jukebox for example – at the same time.
